

# Undergraduate Marine Biology Seminar

## Marine Sciences Program

Dr. John Bruno is a marine ecologist and Professor whose research is focused on marine biodiversity, coral reef ecology and conservation and the impacts of climate change on marine ecosystems.

Dr. Bruno earned his Ph.D. from Brown University in Ecology and Evolutionary Biology and was a postdoctoral fellow at Cornell University in disease ecology. He is currently working primarily in Belize, the Bahamas, Cuba and the Galapagos Islands. Join us for his talk, “**The Ecology of Galapagos Marine Communities**”.

Dr. Bruno is an avid blogger and co-developer of the oceans website SeaMonster ([www.theseamonster.net](http://www.theseamonster.net)).

Featuring  
**Dr. John Bruno**  
Professor  
University of North Carolina  
Chapel Hill

**Tuesday, April 8, 2014,  
3:30p.m.**

Florida International University  
Marine Science Building, Room 150 (BBC)  
Broadcast to PG5-153 (MMC)

**Food and drinks to follow seminar.**  
This event is free and open to the public
